The mission of the Army Medical Department Center & School, U.S. Army Health Readiness Center of Excellence (AMEDDC&S HRCoE), located at Fort Sam Houston, TX, is to envision, design, train, educate and inspire a premier military medical force for decisive action in support of our Nation. The AMEDDC&S HRCoE vision is to be the foundation on which the AMEDD is built, sustained and transformed. Our strategies for accomplishing this vision include excellence in products and services, realizing employee potential, embracing change management and operational excellence.

In addition to its schoolhouse role, the AMEDDC&S HRCoE has highly varied functions in doctrine development and applied research. Through ongoing and extensive research, we determine medical requirements throughout the combat mission, from the battlefield to the medical treatment facilities, as well as test their capabilities, safety, and long-term viability. We enhance virtual military healthcare environments in order to improve casualty reporting capabilities, enable the sharing of invaluable lessons learned and subject matter expertise, and prepare our healthcare graduates to care for Soldiers of the future and their families. Our distributed learning programs and expansive textbook publications deliver training and education wherever and whenever it is needed.

By striving to expand levels of responsibility and capability for our leaders in training and place them in the most realistic and challenging environments possible, we prepare them to make the critical decisions that will determine the outcome of their missions. Through state-of-the-art, hands-on, scenario-based training driven on lessons learned from today's battlefields and clinical environments, we create an environment in which students can develop the educational and training capabilities they will need in order to provide the best casualty and patient care possible.

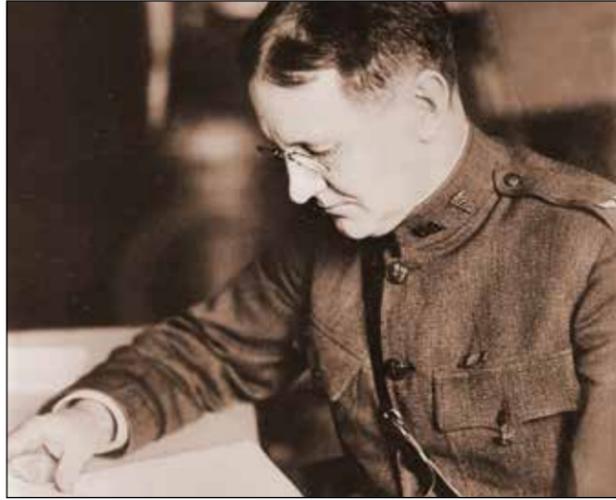

AMEDDC&S HRCoE multi-service training includes prehospital medicine, preventive health services, medical science, veterinary science, health services administration, leadership, clinical support services, nursing science, dental science, combat medic training, and pastoral ministry training. We offer four master's degrees and nine doctoral degrees, with four degree programs highly ranked by US News & World Report. Through our affiliation with top ranked universities, students can earn master's degrees in health administration or combined health and business administration, nutrition, physician assistant studies, and social work; or entry level doctoral degrees in physical therapy, occupational therapy, pastoral care, and anesthesia nursing; or advanced clinical doctoral degrees in physician assistant in emergency medicine, general surgery or clinical orthopedics, sports medicine-physical therapy, and orthopedic and manual physical therapy.

The AMEDDC&S HRCoE also has the responsibility of determining what personnel the AMEDD

needs and designing career patterns to support it. Our dedication to AMEDDC&S professional staff development and career life-cycle management assures us that our students will continue to receive the benefits of the best education and training opportunities available from some of the world's most capable and innovative instructors, training developers, and staff members.

Historical Perspective

1920 The Medical Field Service School was activated at Carlisle Barracks, Pennsylvania, on September 1, 1920. The establishment of the school was prompted by a request from the Surgeon General based on the lessons learned in preparing officers of the Medical Department to serve in World War One. War Department Circular 419, dated December 23, 1920, officially designated the new school as the Medical Department Field Service School, which took the motto "To Conserve Fighting Strength."

1921 The Medical Field Service School was organized into five teaching departments, and the first course of instruction started on June 1, 1921, with a total of fifty medical and twenty dental officers. The mission of the school also included the training of National Guard, Reserve and Non-Commissioned Officers.

1924 The first professional course for Noncommissioned Officers was conducted, and certificates were awarded to 32 Noncommissioned Officers and 14 Privates First Class.

1946 On February 15, 1946, the School was discontinued at Carlisle Barracks, Pennsylvania, and moved to Fort Sam Houston, Texas.

1947 On January 15, 1947, the Army Medical Department schools were consolidated with the Medical Department Enlisted Technicians School and re-designated the "Medical Field Service School."

1972 The Army Medical Department was reorganized in 1972, and the Medical Field Service School was re-designated the Academy of Health Sciences.

1975 In 1975, the Academy of Health Sciences was assigned as a major subordinate unit of the U.S. Army Health Services Command.

1984 In 1984, the Department of Aeromedical Education and Training was re-designated as the Army School of Aviation Medicine and assigned to the Academy of Health Sciences.

1987 In 1987, the 1st and 2d Battalions of the Center Brigade were renamed the 187th and 232d Medical Battalions, respectively. The 3d Battalion was re-designated in 1989 as the Academy Battalion.

1991 Due to the reorganization and expansion of its mission, the Academy of Health Sciences was re-designated in 1991 as the U.S. Army Medical Department Center & School.

1995 In 1995, the U.S. Army Garrison, Fort Sam Houston, Texas, was transferred from the U.S. Army Forces Command to the U.S. Army Medical Command and further assigned for command and control to the U.S. Army Medical Department Center & School.

2001 U.S. Army Trauma Training Center is established as part of the Center and School in Miami, Florida providing hands-on training with the management of severely injured patients.

2005 Defense Base Realignment and Closure Commission (BRAC) "...co-locates all (except Aerospace Medicine) medical basic and specialty enlisted training at Fort Sam Houston, TX with the potential of transitioning to a joint training effort..."

2010 Selected Center and School students and staff transition to Medical Education and Training Campus in accordance with BRAC, where 41 of the 315 Center and School programs of instruction are taught.

2015 The AMEDDC&S was redesignated as the Army Medical Department Center and School, U.S. Army Health Readiness Center of Excellence.

Combat Development Process

We envision and design medical force structure, concepts, personnel requirements, and medical equipment to support the medical force

APPD serves as the AMEDD's analytical activity performing manpower and P-Domain analyses supporting a range of AMEDD and Army customers. We analyze, synchronize, and integrate AMEDD force structure life cycle management within Army-wide DOTMLPF changes. 210.221.9936

Civilian Personnel Proponent Division (CPPD)

Analyzes and makes recommendations pertaining to the training, education, and development of civilian employees in medical-related occupations. The primary focus is supporting 32,000+ employees within 85 Civilian occupational series which are grouped under Career Program 53-Medical. CPPD implements Civilian Workforce Transformation (CWT) initiatives such as developing and maintaining Army Civilian Training, Education, Development System (ACTEDS) Plans, Career Maps and DoD competencies. 210.221-9962

Enlisted Personnel Proponent Division (EPPD)

The Enlisted Personnel Proponent Division (EPPD) provides Military Occupational Specialty (MOS) career field occupational analysis, evaluation, studies, and monitoring capabilities for TSG. EPPD ensures the AMEDD Enlisted force structure meets the needs of the Army by synchronizing and integrating policy changes while managing the sustainment of the eight personnel life-cycle functions. The division is responsible for making recommendations relating to personnel management of the AMEDD Enlisted Career Field 68. 210.221-9910

Force Structure Division

Serves as the one data source within the Directorate providing data, information, analysis, and guidance in support of the following areas: Objective Force Models (OFMs); analytical models and decision support tools for AMEDD in all components; monthly Force Management System (FMS) Web/The Army Authorization Documentation System (TAADS) data extraction and analysis for approved requirement and authorization documents; Medical Occupational Data System

(MODS) inventory and continuation rates; quarterly Critical Skills summaries; specified Area of Concentration (AOC)/MOS and Additional Skill Identifier (ASI) detail data by command; continual data analysis and creation of OFMs for the AMEDD officer corps; collaboration with Army National Guard and Army Reserve to develop an alternative method in determining continuation rates and constructing OFMs. 210.221.9908

Officer Personnel Proponent Division (OPPD)

Serves as the AMEDD's personnel analytical activity for the six AMEDD Officer Corps comprised of ninety-eight AOCs, two AMEDD Warrant Officer AOCs and one AMEDD Immaterial AOC. OPPD also provides similar support for ~4,500 authorized Army National Guard medical officer and warrant officer positions (27 individual AOCs) and ~8,500 authorized USAR medical officer and warrant officer positions (77 individual AOCs). OPPD's analysis and strategic AMEDD officer personnel management policy recommendations assist TSG, Chief of the Army Reserve, Director of the Army National Guard, the Commander of the AMEDDC&S, and the AMEDD Corps Chiefs in support of their roles for the AMEDD IAW AR 600-3 and AR 5-22. 210.221.9964

Capabilities Development and Integration Directorate (CDID)

The AMEDD's Doctrine Writer, Concepts and Capabilities Architect, Future Force Developer Our Vision. A Team of trusted professionals who collaborate, learn, and innovate to turn ideas into medical capabilities that facilitate future Army forces winning in future armed conflict.

Our Mission. The Capabilities Development Integration Directorate (CDID) develops concepts, learns, and integrates capabilities to improve medical support to our Army and the Joint Force.

All CDIDs perform similar functions in support of the U. S. Army Training and Doctrine Command (TRADOC) capabilities development and integration efforts. The Army Capabilities Integration Center (ARCIC) is the Army's lead for integration of Army capabilities across war fighting functions, formations, DOTMLPF-P, and time. The core functions common to all CDIDs are: concepts development, requirements determination, integration of DOTMLPF-P solutions & capabilities, and experimentation. Each CDID task organizes differently to accomplish these functions.

The AMEDDCS, HRCoE CDID has tasks organized into the following divisions:

- Medical Consultant's Division. Serves as the clinical consultants for the Capabilities Development Integration Directorate on all medical capabilities development matters.

- Medical Evacuation Proponency Division. Monitors and facilitates actions for all matters pertaining to doctrine, training, leader development, organization, and materiel related to medical evacuation (air and ground). Provides comprehensive and strategic direction for the development of medical evacuation operational concepts, requirements, and capabilities across the Unified Land Operations for the AMEDD. Chairs the Medical Evacuation Integrated Capabilities Development Team (ICDT) forum which synchronizes aeromedical and ground evacuation systems and functions. Develops requirements for platform and medical equipment packages, modernization, and future capabilities. Located at Fort Rucker, AL and serves as primary liaison to the Aviation Center of Excellence.

Capabilities Development and Integration Directorate (CDID)

- Concepts and Capabilities Division. Envisions, designs, develops and integrates Army medical concepts and capabilities across the DOTMLPF-P domains and manages capabilities, gaps, and solutions input for AMEDD functional areas. Coordinates with the Sustainment Center of Excellence (SCoE) and Maneuver Support Center of Excellence (MSCoE) for the documentation of AMEDD required capabilities within the Sustainment and Protection Functional Concepts.

- Requirements Determination Division. Conducts requirements determination analysis through force design, manpower analysis, materiel solution analysis, and information technology requirements determination to develop and integrate capabilities necessary for the medical force of the future. Represents the user in the materiel acquisition process.

- Experimentation Division. Leverages the Army's Campaign of Learning (CoL) to inform AMEDD capability development efforts by synchronizing AMEDD involvement and participation in key events with the CoL.

- Doctrine and Literature Division. Develops and prepares Army Health System doctrine for the AMEDD, Joint, multi-service, and multi-national doctrinal programs.

- Computational Sciences Division. Provides data-driven analytic support as required by the CDID and other AMEDD entities.

- AMEDD Project Office. Oversees the management/development of the Medical Simulations Training Center (MSTC) capabilities in support of Army medical training support, to include integration into the Army's Enhanced Realistic Training Strategy. In coordination with DoTAA, works and participates with Combined Arms Center Training and other Centers of Excellence to ensure AMEDD simulation and training capabilities and gaps are known and documented, and identified and solutions are presented in the Live, Virtual and Constructive environments. Develops and fosters relationship with TRADOC Capability Manager (TCM) Virtual and Gaming, TCM Live, and Combined Arms Center Training (CAC-T) Training Support Integration & Analysis for AMEDD capabilities. Also serves as the representative of the AMEDDC&S HRCoE in the various requisite forums--- Training Support Systems Enterprise: Home Station/Deployed Council of Colonels, Evolution of Training, Enhanced Realistic Training; IMCOM Communities of Practice Common Level of Service, training support; and Joint Program Committee Medical Simulation and Information Technology.

- Integration Cell. Reviews all capabilities documents and coordinates with other Centers of Excellence, TRADOC Capability Managers, Army Capabilities Integration Center, MRMC, OTSG, MEDCOM, HQDA, and training and materiel developers to support capability development actions. LNO officer located at Ft. Lee, VA to facilitate coordination with SCoE.

The CDID engages and communicates with a broad spectrum of DoD and DA activities to assure that they understand and support the resourcing of the AMEDD's required capabilities.

Our Customers. The Capabilities Development Integration Directorate provides coordination, facilitation, and integration with the U.S. Army Medical Command (MEDCOM); Headquarters, Dept of the Army (HQDA); the Office of the Surgeon General (OTSG); U.S. Army Medical Research and Materiel Command (MRMC); U.S. Army Training and Doctrine Command (TRADOC), U.S. Forces Command (FORSCOM); U.S. Army Reserve Command (USARC); the Joint Staff Surgeon's Office; National Guard Bureau; and the Defense Health Agency.

Our Products and Services. The CDID develops concepts, organizations, and doctrine for Force Health Protection and Health Service Support to the Army across the operational continuum. The CDID is the customer advocate and catalyst for integration and synchronization of the Army Medical Department's required capabilities. Provides data-driven studies, analyses, and evaluations to the HRCoE and OTSG in support of current and future force development.

Army Medical Department Board (AMEDDBD)

The Army Medical Department Board provides independent operational test and evaluation of medical and medical-related materiel and information technology products in support of the Army and Department of Defense acquisition process; provides assessments of emerging concepts, doctrine, and advanced technology applications applied to the delivery of healthcare, both on the battlefield and in fixed facilities. 210.221.1238

The Statistical Analysis Cell (SAC)

The Statistical Analysis Cell conducts strategic, statistical, data-driven studies and analyses in support of decision- and policy-making, management and administration of Army medicine. The SAC, formerly the Statistical Analysis Branch of the Center for AMEDD Strategic Studies (CASS), is composed of statisticians with various backgrounds and specialized experience. All staff members have earned advanced degrees in a variety of areas and have professional experience in military healthcare analysis, statistics, computer programming, data mining and epidemiology. Our expertise in data analysis and management have made the Statistical Analysis Cell a pioneer in the development and execution of many deployment healthcare-related studies and medical surveillance projects that have provided data-driven analyses for Army and DoD medical planners and decision makers. Our studies and analyses rely upon our ability to create complex, healthcare-related datasets from secondary data sources. Data are obtained and analyzed following strict data governance rules approved by the Army Human Research Protection Office (AHRPO).

The Statistical Analysis Cell developed the current methodology and is the proponent for the disease and non-battle injury rates used in the Total Army Analysis (TAA) process. Statistical analysts perform both comprehensive, strategic studies and short-term, ad-hoc analyses. In addition, we have developed web-enabled, data-driven tools to assist Army medicine leaders and planners. Recent projects have focused on disease and injury admission rates, in-theater dental emergency encounters, spinal cord injuries, paralysis, traumatic brain injuries, the Barell Matrix expansion, and behavioral health.

Borden Institute

Borden Institute, AMEDD Journal, and Medical Soldiers Outlook

Borden Institute is responsible for producing Textbooks of Military Medicine, covering a spectrum of military medical scholarship. The AMEDD Journal Branch creates and publishes the US Army Medical Department Journal and the Medical Soldiers Outlook. The AMEDD Journal is a quarterly, professional, peer-reviewed publication with worldwide distribution. It provides a forum for the presentation and exchange of the most current, high level healthcare, clinical and medical research information, as well as medically related combat experiences and military doctrine development ideas and proposals. The Outlook is a training information newsletter. The publication is distributed worldwide to Active Army and Reserve Component enlisted personnel to provide current information on resident and nonresident training courses, educational opportunities, doctrine revisions, and medical MOS changes and updates.

Professional Education and Training Department

The Professional Education and Training Department provides a world class education system that is answerable to the US Army and the American people through development of AMEDD education training policies, ensuring adherence to education training policy and accreditation standards; advocating education and training issues; managing quotas and funds for Army, civilian, and federal courses; developing and implementing AMEDD policies and programs to comply with Department of Defense instructions and inter-service training review organizations.

210.295-9508/9528

Curriculum Development Department

The Curriculum Development Division's mission is to create relevant customer-focused education and training products that support the medical mission.

210.221-0077/0526

Instructional Technology Division (ITD)

The Instructional Technology Division is a one-stop support center for Army medical education and training instructional technology products, services, and expertise. We research, evaluate, and leverage technology-based training tools to enhance and expand our customers' access to military medical education and training.

Instructional Technology Guidance and Support

- Instructional technology policy, best practices, and business rules
- Options and recommendations for media and delivery
- Curriculum evaluations for readiness and suitability for instructional technology
- Marketing support to help promote new courses and updates to existing courses

Instructional Technology Development and Delivery

- Development and delivery of small to large, CD and web-based interactive multimedia instruction (IMI) products
- Development and delivery of video products ranging from web quality to high definition
- Contract assistance for external IMI development products
- IMI implementation assistance (product testing/loading coordination)

Instructional Technology Facilities and Technical Support

- Satellite and video tele-training classrooms and teach-out room with connection and tech support
- A fully staffed computer lab for student use when completing projects and assignments
- Three fully equipped computer classrooms with on staff tech support

210.221-8142/8461

Directorate of Training & Academic Affairs (DoTAA)

Enlisted Subject Matter Expert (SME) Department

The Enlisted SME Department supports the Army Medical Department's appointed Enlisted Military Occupational Specialty (MOS) Experts that are located worldwide. Each AMEDD MOS has an appointed SME who assists with AMEDD's Enlisted Human Capital Distribution Plan and provides recommendations to the Command Sergeant Major of the US Army Medical Command in support of the AMEDD's mission.

210. 221-7628

Interservice Training Review Office

Conducts intensive analysis of a variety of training programs or initiatives across the Army Medical Department and is the liaison to tri-service components, professional educators, medical care providers, and training technologists within and outside the U.S. Army Health Readiness Center of Excellence.

210.221-6121

Directorate of Training & Academic Affairs (DoTAA)

Training Program Management Department

The Training Program Management Department implements and manages automated training development and management systems and processes for the AMEDD in support of quality, standardized military medical training programs that meet Army readiness requirements. We also lead the way in supporting Army training technology growth and evolution with the vision of delivering quality training to anyone, any-time, anywhere.

210.221-8745/7385

Stimson Library (SL)

Stimson Library provides information resources and services to support the training and research mission of the US Army Medical Department Center and School. SL supports medical activities at Fort Sam Houston and serves as an information resource for the Army Medical Department worldwide.

210.221-6900/8281

Staff and Faculty Development Department

The Staff and Faculty Development Department provides professional development training opportunities for US Army Medical Department Center and School staff and faculty through both innovative and traditional training programs.

210.221-6972/8816

Specialty Organizations

68W - Health Care Specialist

U.S. Army Emergency Medical Services Programs Management Office

The EMS Program supports all 68Ws and Army-sponsored EMS training sites worldwide. The U.S. Army EMS Programs Management Division is the AMEDDC&S office assigned as the TSG's execution agency for 68W MOS oversight and is the appointed National Registry of Emergency Medical Technicians (NREMT) regulatory agency that provides site codes and quality assurance oversight. The EMS Program provides liaison and SME support for the Medical Simulation Training Centers supporting 68W's and non-medical soldiers for all three components of the Army; conducts criminal background investigations in conjunction with Ft. Sam Houston's JAG office; and serves as the decision authority that grants personnel permission to take an NREMT exam. 210.221.0837

International Military Student Office (IMSO)

In 2000, Congressional and State Department authorization expanded the Defense Department Joint Security Assistance Education and Training Program to increase training opportunities within the international military community.

Some of the major objectives of this program have the express purpose of promoting standardization and interoperability in order to enhance coalition operations in support of our Nation while building partner capacity.

Today, the AMEDD Center & School has a pivotal role in this mission, an integral part of our national security. In addition, through the congressional-directed DOD Field Studies Program, international military students are also provided a balanced understanding of the U.S. society, institutions, and democratic ideals. 210.221.8579
