

Post Deployment Serum Storage

MAJ Martin Tenney

Deputy Laboratory Program Manager

Post Deployment Serum Storage

- Purpose: To collect and place into storage a Post Deployment Serum sample for future testing, if necessary.
- Procedure: During the Post Deployment Medical Screening, an order for an HIV using the Source of testing code “H – Post Deployment Serum Storage” will be placed in CHCS.

Serum Storage (cont)

- All HIV serum samples are sent to AMSA for storage.
- A blood sample will be collected at the SRP site or laboratory and sent by the laboratory staff to ViroMed.
- Once resulted the sample will be forwarded by ViroMed to the Serum Repository.
