

MEDCOM Mobilization Missions

and

Planned Reserve Component Support

MEDCOM WARTIME MISSIONS –

- **Provide Trained Fillers to Deployers**

- **Installation and Deployment Support**
 - **Clinic & Inpatient Support**
 - **SRP / Demobilization**
 - **Increased Blood Quotas**
 - **Veterinary Food Inspection**

- **Expansion of Inpatient Capabilities**

- **Continuation of Beneficiary Care**

➤ ***Provide Trained Fillers to Deployers***

PROFESSIONAL FILLER SYSTEM = PROFIS

PROFIS:

A requirement for a specific Area of Concentration (AOC) in a deploying unit. These pre-designated personnel are typically slated to fill a vacant Medical Officer or Nurse position in both medical and non-medical MTOE units prior to deployment to a theater.

CARETAKER PROFIS:

A requirement for the complete fill, officer and enlisted, of all positions in a MTOE Caretaker (deploying) hospital, less the existing cadre. This constitutes a much larger PROFIS pull from the MTFs.

➤ **Installation and Deployment Support**

Direct Soldier Support Areas

- **Medical and Dental Clinic Support**
- **Provisions for Inpatient Support**
- **Soldier Readiness Processing**
- **Demobilization Processing**

Other Deployment Support Areas

- **Increased Blood Quotas**
- **Expanded Food Inspection**

Power Projection and Power Support Platforms

Ft. Benning, GA
 Ft. Bliss, TX
 Ft. Bragg, NC
 Ft. Campbell, KY
 Ft. Carson, Co
 Ft. Dix, NJ
 Ft. Drum, NY
 Ft. Eustis, VA
 Ft. Hood, TX
 Ft. Lewis, WA
 Ft. McCoy
 Ft. Polk, LA
 Ft. Riley, KS
 Ft. Sill, OK
 Ft. Stewart, GA

PSP - 12

Aberdeen PG, MD
 Ft. Buchanan, PR
 Ft. Huachuca, AZ
 Ft. Jackson, SC
 Ft. Knox, KY
 Ft. Lee, VA
 Ft. LWood, MO
 Ft. Rucker, AL
 Cp Atterbury, IN
 Cp Roberts, CA
 Cp Shelby, MS
 Gowen Field, ID

 = No Inpatient Capability

 = Semi-Active Federal

 = State Operated

1. These installations have a small support staff compared to active Army installations.
2. Medical and Dental facilities are limited, if available at all.
3. Special planning will be needed to provide medical and dental support to RC units reporting during a contingency, i.e. medical and dental emergencies, evacuation, inpatient support, definitive dental treatment in support of “discovered Class 3” prior to deployment.

Direct Soldier Support Areas

- Medical and Dental Clinic Support
- Provisions for Inpatient Support

- ❖ These are implied missions that pertain to the possible need for expanded medical and dental clinic support associated with increased RC unit populations being present at Power Projection/Power Support Platforms (PPP/PSP).
- ❖ The increase in population also will generate an increase in inpatient bed requirement due to the increase in the Disease Non-Battle Injury rate (DNBI) and training accidents.
- ❖ Medical planners must maintain a good “handle” on the changing installation populations during the peak deployment phases at their installations and plan to meet the medical and dental needs of the beneficiary population via a combination of the medical capability of on post military staff and facilities, contracted services, and through local civilian medical community, depending on the availability of each.

Direct Soldier Support Areas

- **Soldier Readiness Processing**
- **Demobilization Processing**

- ❖ **These missions directly support the deployment of all COMPOs and the demobilization of the COMPO 2 and 3.**
- ❖ **While the overall responsibility for Soldier Readiness Processing & Demobilization with the installation, the Medical and Dental aspects are the responsibility of the supporting MTF/DTF having Health/Dental Service Area (HSA/DSA) responsibility via the Director of Health/Dental Services (DHS/DDS).**
- ❖ **The provision of follow-on medical and dental care for those demobilizing soldiers, having a service connected medical/ dental problem, is of the utmost importance and must be well planned and supported.**

➤ Expansion of Inpatient Capabilities

Expansion within Primary Receiving Centers

- Brooke AMC
- Eisenhower AMC
- Madigan AMC
- William Beaumont AMC
- Walter Reed AMC

Expansion within Selected CONUS MTF

- Benning
- Bragg
- Campbell
- Hood
- Stewart

Expansion of Inpatient Capabilities

Additional Factors:

1. Expansion is at Power Projection Sites where Corps or Divisions are in garrison (where families reside)
2. Primary Receiving Centers must be able to support the medical needs of a wide variety of returning casualties

3. DoD Primary Backup

=

Department of
Veterans Affairs

DoD Secondary Backup

=

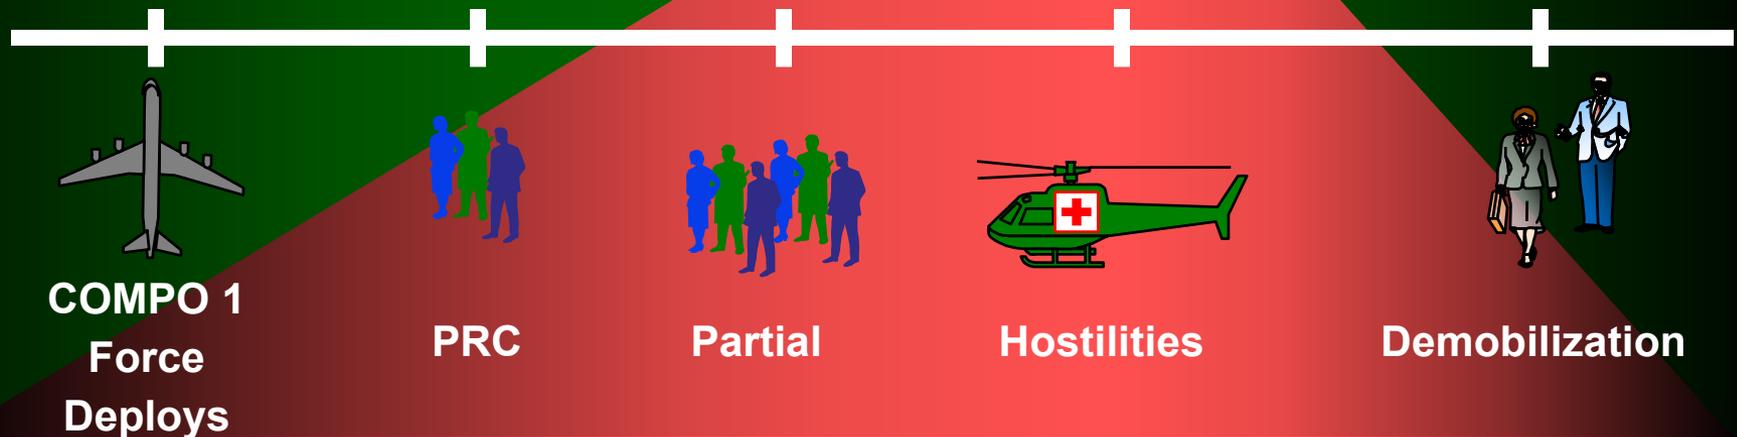

National Disaster
Medical System

A Possible Mobilization Timeline

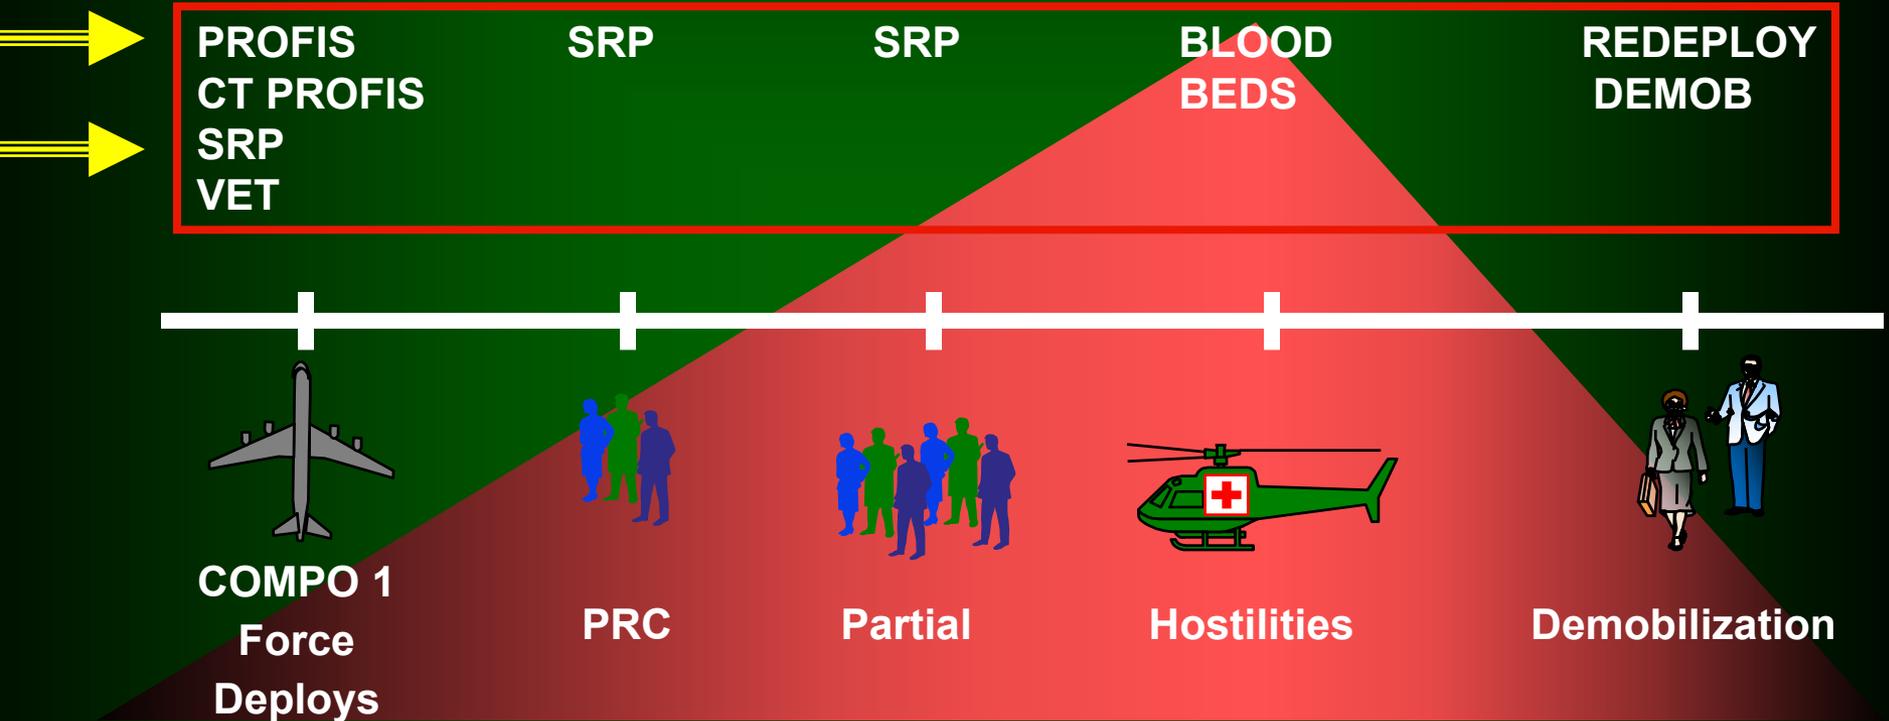

1. The event “tick marks” on the timeline may be compressed closely in a rapidly developing situation or stretched in a scenario that is slow to develop.
2. Of course, hostilities may occur at anytime, even being the first item, which may compress the timeline and may force a move directly to a higher level of mobilization.

A Possible Mobilization Timeline

Potential Mission Requirements

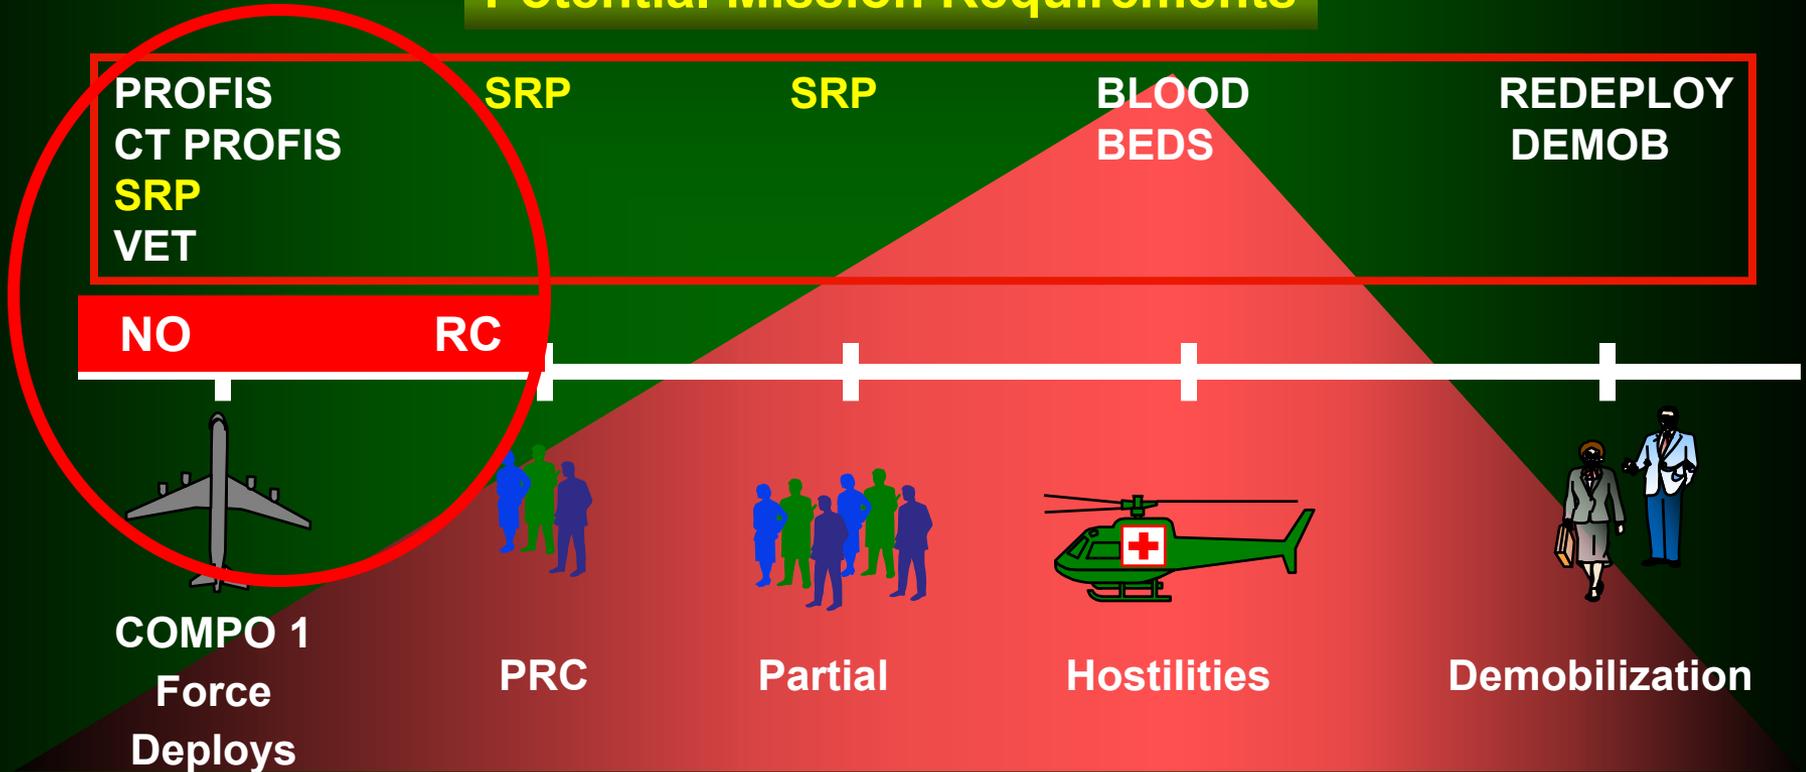

The actual mission requirements associated with deployment will reach “peaks & valleys” along the timeline.

A Possible Mobilization Timeline

Potential Mission Requirements

Note that RC units aligned to provide mission support are not available for call until at least PRC. RMCs / MTFs must plan to meet early mission requirements with "in-house" assets especially if it is a slowly unfolding scenario.

Medical Support Unit (MSU)

BDC Expansion Unit

Veterinary Food Inspection

Medical Support Unit (MSU)

- 1. Designed to provide the needed core staffing required for SRP / Demobilization operations OR on an interim basis, TMC and DC augmentation.**
- 2. Will be called early for SRP support to deploying COMPO 1, 2 & 3. May require additional augmentation, from MTF/DTF staff, with increased workload; used in TMC/DC with reduced workload. RMC Commander may move to other SRP/Demobilization site.**
- 3. Unit does NOT have equipment. Equipment for SRP operations is the responsibility of the MTF & DTF.**
- 4. The MSU is not a “stand alone unit”. It must receive all support from the parent MTF/ Installation.**
