

AMEDDC&S HRCOE PAM 350-10

EFMB Test Score Sheet EVAC — LOAD CASUALTIES ONTO GROUND EVACUATION PLATFORM (M996, M997, OR M113) (For use of this form, see AMEDDC&S HRCOE Pam 350-10, the proponent is MCCS-OPE)		
CANDIDATE'S RANK AND NAME	CANDIDATE #	
TASK: LOAD CASUALTIES ONTO GROUND EVACUATION PLATFORM (M996, M997, OR M113).		
CONDITIONS: Given an unconfigured ground evacuation platform and three treated casualties, (two secured on litters with straps and one ambulatory). You and three noncandidate Soldiers will form a litter squad, with you serving as the number 1 person to load the casualties.		
STANDARDS: Configure the vehicle properly. Prioritize, load, and secure three casualties (two litter and one ambulatory) within 15 minutes, in the proper sequence, without causing further injury to the casualties.		
NOTE: THIS TASK HAS BEEN MODIFIED FOR EFMB TESTING PURPOSES ONLY.		
PERFORMANCE STEPS/MEASURES	GO	NO-GO
1. Survey and prioritize the casualties to determine loading sequence.		
NOTE: Time starts when the candidate starts surveying the casualties, starts the steps to secure the casualties onto the litters, or starts the steps to configure the vehicle.		
NOTE: Casualties are prioritized IAW Table 7-1, Medical Evacuation Precedence, in this publication. A DD Form 1380 will be placed on each casualty with the exact verbiage of injuries from the TCCC- Triage Casualties task.		
a. Casualties are normally loaded head first. They are less likely to experience motion sickness or nausea with the head in the direction of travel. When en route, if care is required for an injury on one side, it may be necessary to load feet first to access the casualty from the aisle.		
b. Casualties with wounds of the chest or abdomen or those receiving IV fluids are loaded in lower berths to provide gravity flow.		
c. Casualties wearing bulky splints should be placed on lower berths.		
2. Verify the security of the straps on the two casualties on litters.		
3. Configure and prepare the vehicle properly to receive the casualties (two litter and one ambulatory). Remove any debris and trash.		
4. Serve as the number 1 person and, with the assistance of the noncandidate Soldiers, move the litters to the vehicle.		
5. Load the casualties, in the proper sequence, onto the vehicle.		
a. M996.		
(1) Load the litter head first in the right berth and then left.		
(2) Instruct the ambulatory casualty to sit in the aisle or tailgate seat.		
b. M997 and M113.		
(1) Load the litter head first in the upper right berth and then lower right.		
(2) Instruct the ambulatory casualty to sit on the left side of the vehicle.		
6. Secure the casualties for transport.		
NOTE: The noncandidate Soldiers may assist the candidate by securing the litters onto the litter racks. However, it is still the candidate's responsibility to ensure that the litters are properly secured.		
7. Fold and stow the litter rail extension (if applicable).		
8. Close the door and secure the latch.		
NOTE: Time ends when the door is secured.		
9. Did not cause further injury to the casualties.		

10. Complete all required performance steps/measures within 15 minutes.					
11. Met all administrative requirements for this task
