The bacteria that cause anthrax (*green*) are being enveloped by an immune system phagocytic cell (*purple*). These bacteria live in soil and form dormant spores that can survive for decades. When spores enter humans through the respiratory or gastrointestinal tracts or the skin, they germinate to bacilli and rapidly increase in number. Phagocytic cells of the host immune system are essential for ingesting and killing the bacteria, and this is enhanced after vaccination. This is but one example to illustrate the important interactions between pathogens and the infected host’s immune system.

2018
This volume was prepared for military medical educational use. The focus of the information is to foster discussion that may form the basis of doctrine and policy. The opinions or assertions contained herein are the private views of the authors and are not to be construed as official or as reflecting the views of the Department of the Army or the Department of Defense.

**Dosage Selection:**

The authors and publisher have made every effort to ensure the accuracy of dosages cited herein. However, it is the responsibility of every practitioner to consult appropriate information sources to ascertain correct dosages for each clinical situation, especially for new or unfamiliar drugs and procedures. The authors, editors, publisher, and the Department of Defense cannot be held responsible for any errors found in this book.

**Use of Trade or Brand Names:**

Use of trade or brand names in this publication is for illustrative purposes only and does not imply endorsement by the Department of Defense.

**Neutral Language:**

Unless this publication states otherwise, masculine nouns and pronouns do not refer exclusively to men.

Foreword by The Surgeon General xxi

Preface xxiii

1. Historical Overview: From Poisoned Darts to Pan-Hazard Preparedness
   George W. Christopher, Daniel M. Gerstein, Edward M. Eitzen, and James W. Martin 1

2. Epidemiology of Biowarfare and Bioterrorism
   Zygmunt F. Dembek, Julie A. Pavlin, Martina Siwek, and Mark G. Kortepeter 37

3. Food, Waterborne, and Agricultural Diseases
   Zygmunt F. Dembek, and Edwin L. Anderson 71

4. Consequence Management: The Local and National Response
   Neal E. Woollen, and Gary W. Carter 93

5. Medical Management of Potential Biological Casualties: A Stepwise Approach
   Theodore J. Cieslak 109

6. Anthrax
   Bret K. Purcell, Christopher K. Cote, Patricia L. Worsham, and Arthur M. Friedlander 129

7. Brucellosis
   Bret K. Purcell, R. Martin Roop II, Arthur M. Friedlander, and David L. Hoover 159

8. Glanders
   Susan L. Welkos, Bridget Carr Gregory, David M. Waag, and Mary N. Burtnick 177

9. Melioidosis
   Paul J. Brett, David DeShazer, and Nicholas J. Vietri 223

10. Plague
    Patricia L. Worsham, Thomas W. McGovern, Nicholas J. Vietri, Arthur M. Friedlander, and Joel Bozue 247

11. Tularemia
    Matthew J. Hepburn, Todd M. Kijek, Wendy Sammons-Jackson, Arthur M. Friedlander, and Zygmunt F. Dembek 285

12. Q Fever
    Christina M. Farris and James E. Samuel 305

13. Multidrug-Resistant Bacterial Infections as a Threat to the US Military Health System:
    Acinetobacter Infections as a Case Study
    Emil Lesho, Luther E. Lindler, Bruno Petrucelli, and Glenn Wortmann 321

14. Botulinum Toxin
    Zygmunt F. Dembek, Leonard A. Smith, Frank J. Lebeda, and Janice M. Rusnak 337

15. Clostridium Perfringens Epsilon Toxin
    Bradley G. Stiles, Gillian Barth, and Michel R. Popoff 361
16. Ricin
Virginia I. Roxas-Duncan, Martha L. Hale, Jon M. Davis, John C. Gorbet, Patricia M. Legler, and Leonard M. Smith

17. Staphylococcal Enterotoxin B and Related Toxins Produced by Staphylococcus Aureus and Streptococcus Pyogenes
Kamal U. Saikh, Robert G. Ulrich, and Teresa Krakauer

18. Toxins from Venoms and Poisons
Scott A. Weinstein and Julian White

19. Marine Algal Toxins of Concern as Intentional Contaminants
Mark A. Poli and Mark R. Withers

20. Alphavirus Encephalitides
Shelley P. Honnold, Eric C. Mossel, Lesley C. Dupuy, Elaine M. Morazzani, Shannon S. Martin, Mary Kate Hart, George V. Ludwig, Michael D. Parker, Jonathan F. Smith, Douglas S. Reed, and Pamela J. Glass

21. Hemorrhagic Fever-Causing Mammarenaviruses
Sheli R. Radoshitzky, Jens H. Kuhn, Peter B. Jahrling, and Sina Bavari

22. Henipaviruses
Arnold Park, Sheli R. Radoshitzky, Jens H. Kuhn, and Benchur Lee

23. Filoviruses
Sheli R. Radoshitzky, Sina Bavari, Peter B. Jahrling, and Jens H. Kuhn

24. Smallpox and Related Orthopoxviruses
Arthur J. Goff, Sara C. Johnston, Kenny L. Lin, Peter B. Jahrling, John W. Huggins, M. Sofi Ibrahim, James V. Lawler, and James W. Martin

25. Emerging Infectious Diseases and Future Threats
Chris A. Whitehouse and Brett Beitzel

26. Laboratory Identification of Threats
David A. Norwood, Timothy D. Minogue, Randal J. Schoepp, and Mark J. Wolcott

27. Medical Countermeasures
Philip R. Pittman, Elizabeth Brown, and Matthew S. Chambers

28. Future Prospects of Vaccines and Antibodies in Biodefense
Jeffrey Froude II, Crystal W. Burke, and Jean-Nicolas Tournier

29. Aerobiology: History, Development, and Programs
Douglas S. Reed, Aysegul Nalca, and Chad J. Roy

30. Biosafety
David E. Harbourt, Catherine L. Wilhelmsen, Kristie M. Yeakle, and Robert J. Hawley

31. Biological Surety
Samuel S. Edwin, Virginia I. Roxas-Duncan, America M. Ceralde, Shelley C. Jorgensen, and Neal E. Woollen

32. Ethical Issues in the Development of Drugs and Vaccines for Biodefense
Arthur O. Anderson, Jeffrey E. Stephenson, and Bret K. Purcell

Abbreviations and Acronyms

Index
Contributors

ARTHUR O. ANDERSON, MD
Colonel (Retired), Medical Corps, US Army; Director, Office of Human Use and Ethics, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

EDWIN L. ANDERSON, MD
Colonel (Retired), Medical Corps, US Army; Research Professor, Department of Internal Medicine, Division of Infectious Diseases, Allergy and Immunology, Saint Louis University School of Medicine, 1100 South Grand Boulevard, St. Louis, Missouri 63104

GILLIAN BARTH, BS
Veterinary Technician, Veterinary Department, Wilson College, 1015 Philadelphia Avenue, Chambersburg, Pennsylvania 17201

SINA BAVARI, PhD
Science Director, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Room 900, Fort Detrick, Maryland 21702; formerly, Division Chief, Toxicology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Room 900, Fort Detrick, Maryland

BRETT BEITZEL, PhD
Principal Investigator, Center for Genomic Sciences, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

JOEL BOZUE, PhD
Microbiologist, Bacteriology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

PAUL J. BRETT, PhD
Associate Professor, Department of Microbiology and Immunology, University of South Alabama, 610 Clinic Drive, Laboratory of Infectious Diseases Building, Mobile, Alabama 36688

ELIZABETH S. BROWN, PhD
Medical–Technical Writer and Editor, Department of Clinical Research, Division of Medicine, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

CRYSTAL W. BURKE, PhD
Research Microbiologist, Virology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Room 6, Fort Detrick, Maryland 21702

MARY N. BURTNICK, PhD
Assistant Professor, Department of Microbiology and Immunology, University of South Alabama, 5851 USA Drive North, Medical Science Building, Mobile, Alabama 36688

GARY W. CARTER
Director, Field Operations and Training, National Strategic Research Institute, 3925 Dewey Avenue, Omaha, Nebraska 68198

AMERICA M. CERALDE, MBA, MT(AMT)
Alternate Surety Officer and Chief, Personnel Reliability Program Branch, Biosurety Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

MATTHEW S. CHAMBERS, MD, MPH
Lieutenant Colonel, Medical Corps, US Army; Chief, Preventive Medicine, Fort Wainwright, 4077 Neely Road, Fort Wainwright, Alaska 99703; formerly, Chief, Field Studies, Division of Medicine, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

GEORGE W. CHRISTOPHER, MD, FACP
Lieutenant Colonel (Retired), Medical Corps, US Air Force; Chief Medical Officer, Joint Project Manager-Medical Countermeasure Systems (JPM-MCS), 10109 Gridley Road, Building 314, 2nd Floor, Fort Belvoir, Virginia 22060-5865

THEODORE J. CIESLAK, MD
Colonel, Medical Corps, US Army; Pediatric Infectious Diseases Physician, San Antonio Military Medical Center, Department of Pediatrics, 3551 Roger Brooke Drive, Fort Sam Houston, Texas, 78234

CHRISTOPHER K. COTE, PhD
Principal Investigator, Division of Bacteriology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

JON M. DAVIS, PhD
Lieutenant Colonel, Medical Service Corps, US Army; Department of Defense Liaison to the ASPR, Department of Health and Human Services, 200 C Street, SW, Washington, DC 20024; formerly, Deputy Medical Coordinator, Office of the Assistant Secretary of Defense for Nuclear, Chemical, and Biological Defense, 3050 Defense Pentagon, Washington, DC

ZYGMUNT F. DEMBEK, PhD, MS, MPH, LHD
Colonel (Retired), Medical Service Corps, US Army Reserve; Associate Professor, Department of Military and Emergency Medicine, Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Bethesda, Maryland 20814; formerly, Chief Biodefense Epidemiology and Education & Training Programs, Division of Medicine, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

DAVID DeSHAZER, PhD
Microbiologist, Bacteriology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

LESLEY C. DUPUY, PhD
Microbiologist, Virology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

SAMUEL S. EDWIN, PhD
Responsible Official and Surety Officer; Chief, Biosurety Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702
EDWARD M. EITZEN, MD, MPH
Colonel (Retired), Medical Corps, US Army; Senior Partner, Biodefense and Public Health Programs, Martin-Blank and Associates, 2034 Eisenhower Avenue, Suite 270, Alexandria, Virginia 22314-4678; formerly, Commander, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

CHRISTINA M. FARRIS, PhD
Lieutenant, Medical Service Corps, US Navy; Viral and Rickettsial Diseases Department, Naval Medical Research Center, 503 Robert Grant Avenue, Silver Spring, Maryland 20910

ARTHUR M. FRIEDLANDER, MD
Colonel (Retired), Medical Corps, US Army; Senior Scientist, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; and Adjunct Professor of Medicine, Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Bethesda, Maryland 20814

JEFFREY FROUDE, PhD
Clinical Pharmacology Fellow, Experimental Therapeutics Division, Walter Reed Institute of Research, 503 Robert Grant Avenue, Silver Spring, Maryland 21702

DANIEL M. GERSTEIN, PhD
Colonel (Retired), US Army; Adjunct Professor, School of International Studies, American University, 4400 Massachusetts Avenue, NW, Washington, DC 20016; formerly, Undersecretary (Acting) and Deputy Undersecretary, Science and Technology Directorate, Department of Homeland Security, Washington DC

PAMELA J. GLASS, PhD
Chief, Viral Biology Department, Virology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

ARTHUR J. GOFF, PhD
Research Microbiologist, Department of Virology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

JOHN C. GORBET, PhD
Captain, Medical Service Corps, US Army; Chief, Department of Aerosol Services, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

BRIDGET CARR GREGORY, DVM, MPH
Colonel, US Air Force, Biomedical Sciences Corps; Deputy Chief of Staff, Defense Threat Reduction Agency/Strategic Command for Combating Weapons of Mass Destruction, 8275 John J. Kingman Road, Fort Belvoir, Virginia 22060; formerly, Chief, Education and Training, Division of Medicine, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

MARTHA L. HALE, PhD
Research Microbiologist, Integrated Toxicology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

DAVID E. HARBOURT, PhD, SM(NRCM), RBP
Biosafety Officer, Office of Safety, Radiation, and Environment, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; formerly, Fellow, National Biosafety and Biocontainment Training Program, National Institutes of Health, 13 South Drive, Bethesda, Maryland

MARY KATE HART, PhD
Chief Scientific Officer, Dynport Vaccine Company, 64 Thomas Johnson Drive, Frederick, Maryland 21702; formerly, Chief, Virology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

ROBERT J. HAWLEY, PhD, RBP, CBSP
Consultant, Biological Safety and Security, Alliance Biosciences, 6810 Deepth Road, Suite 315, Elkridge, Maryland 21075; formerly Senior Advisor, Science, Midwest Research Institute, 110 Thomas Johnson Drive, Suite 170, Frederick, Maryland; formerly, Chief, Safety and Radiation Protection, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

MATTHEW J. HEBBURN, MD
Colonel, US Army; Program Manager, Biological Technologies Office, Defense Advanced Research Projects Agency (DARPA), 675 North Randolph Street, Room 08-140, Arlington, Virginia 22203-2114; formerly, Clinical Research Unit Lead, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

SHELLEY P. HONNOLD, DVM, PhD
Lieutenant Colonel, Veterinary Corps, US Army; Director, Research Support and Chief, Pathology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; formerly, Biodefense Research Pathologist, Pathology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

DAVID L. HOOVER, MD
Colonel (Retired), Medical Corps, US Army; Senior Scientific Advisor, Clinical Research Management, 1265 Ridge Road, Hinkley, Ohio 44233; formerly Medical Director, Dynport Vaccine Company LLC, a CSC Company, 64 Thomas Johnson Drive, Frederick, Maryland, and Scientific Coordinator, Brucella Program, Department of Bacterial Diseases, Walter Reed Army Institute of Research, Silver Spring, Maryland

JOHN W. HUGGINS, PhD
Retired; formerly, Chief, Viral Therapeutics Branch, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

M. SOFI IBRAHIM, MSc, PhD
Lieutenant Colonel, Medical Service Corps, US Army Reserve; Research Microbiologist, Edgewood Chemical Biological Center, Ricketts Point Road, Gunpowder, Maryland 21010; formerly, Microbiologist, Division of Virology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

PETER B. JAHRLING, PhD
Captain (Retired), Medical Service Corps, US Army; Director, National Institutes of Health/Division of Clinical Research/National Institute of Allergy and Infectious Diseases/Integrated Research Facility, 8200 Research Plaza, Room 1A-111A, Fort Detrick, Maryland 21702; formerly, Principal Scientific Advisor (Senior Research Scientist), US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

SARA C. JOHNSTON, PhD
Research Microbiologist, Department of Virology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702
SHELLEY C. JORGENSEN, PhD, MT(ASCP)
Lieutenant Colonel, Medical Services, US Army; Chief, Surety Branch, US Army Office of The Surgeon General/US Army Medical Command, G-34 Protection Division, DHQ, 7700 Arlington Boulevard, Falls Church, Virginia 22042

TODD M. KIJEK
Major, Medical Service Corps, US Army; PhD candidate and Chief, Molecular and Translational Sciences Department, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; formerly, Research Microbiologist, Bacteriology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

JASON KINDRACHUK, PhD
Staff Scientist, Critical Care Medicine Department, Clinical Center, National Institutes of Health, 10 Center Drive, Bethesda, Maryland 20814

MARK G. KORTEPETER, MD, MPH
Colonel, Medical Corps, US Army; Director, Infectious Disease Clinical Research Program, Department of Preventive Medicine, Associate Dean for Research, Associate Professor of Preventive Medicine and Medicine, Consultant to the Army Surgeon General for Biodefense, Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Bethesda, Maryland 20814; formerly, Deputy Commander, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

TERESA KRAKAUER, PhD
Microbiologist, Department of Immunology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

JENS H. KUHN, MD, PhD, PhD, MS
Virology Lead, National Institutes of Health/National Institute of Allergy and Infectious Diseases/Division of Clinical Research/Integrated Research Facility, B-8200 Research Plaza, Room 1A-132, Fort Detrick, Maryland 21702; formerly, Research Scholar, Harvard Medical School, Department of Microbiology and Molecular Genetics, New England Primate Research Center, 1 Pine Hill Drive, Southborough, Massachusetts

JAMES V. LAWLER, MPH, MD
Commander, Medical Corps, US Navy Reserve; ACESO Director and Chief, Clinical Research Department, Biodefense Research Directorate, Naval Medical Research Center, Fort Detrick, Maryland 21702; formerly, Chief Medical Officer, Integrated Research Facility, Fort Detrick, Maryland

FRANK J. LEBEDA, PhD
Acting Director and Chief Data Officer, Systems Biology Collaboration Center for Environmental Health Research, US Army Medical Research and Materiel Command, 568 Doughten Drive, Fort Detrick, Maryland 21702; formerly, Civilian Deputy Director, Combat Casualty Care Research Program, US Army Medical Research and Materiel Command, 504 Scott Street, Fort Detrick, Maryland

BENHUR LEE, MD
Professor, Microbiology Department, Icahn School of Medicine at Mount Sinai, One Gustave L. Levy Place, Annenberg Building, Room 17-24, New York, New York 10029

PATRICIA M. LEGLER, PhD
Research Biologist, US Naval Research Laboratory, 4555 Overlook Avenue, Washington, DC 20375

EMIL LESHO, DO
Director, Multidrug-Resistant Organism Repository and Surveillance Network, Walter Reed Army Institute of Research, 503 Walter Grant Avenue, 1W102, Silver Spring, Maryland 20910

KENNY L. LIN, MS
GLP Study Coordinator, Nonclinical Development Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; formerly, Regulatory Scientist, Department of Virology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

LUTHER E. LINDLER, PhD
Biosurveillance Liaison, Armed Forces Health Surveillance Center, 11800 Tech Road, Silver Spring, Maryland 20904

GEORGE V. LUDWIG, PhD
Deputy Principal Assistant for Research and Technology, US Army Medical Research and Materiel Command, 810 Schneider Street, Fort Detrick, Maryland 21702; formerly, Science Director, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

JAMES W. MARTIN, MD, FACP
Colonel (Retired), Medical Corps, US Army; Chief of Internal Medicine, US Army Healthcare Clinic, Vicenza, APO AE 09630-0040; formerly, Chief, Operational Medicine Department, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

SHANNON S. MARTIN, PhD
Vaccine Program Manager, Clinical Research Management, Business Plans and Programs Office, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; formerly, Senior Scientist/Technical Development Manager, Nonclinical Research Department, Dynport Vaccine Company, 64 Thomas Johnson Drive, Frederick, Maryland

THOMAS W. McGOVERN, MD, FAAD, FACMS, KHS
Major, Medical Corps, US Army (former); Dermatologist/Mohs Surgeon, Fort Wayne Dermatology Consultants, 7881 Carnegie Boulevard, Fort Wayne, Indiana 46804; formerly, Ward Officer, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

TIMOTHY D. MINOGUE, PhD
Chief, Molecular Diagnostics Department, Diagnostic Systems Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

ELAINE M. MORAZZANI, PhD
Oak Ridge Institute for Science and Education Fellow, Viral Biology Department, Virology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; formerly, NRC Postdoctoral Fellow, Virology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland
ERIC C. MOSSEL, Ph.D
Major, Medical Service Corps, US Army Reserve; Microbiologist, Division of Virology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; formerly, Science and Technology Advisor, Detachment 8, Research Development and Engineering Command, 5183 Blackhawk Road, Aberdeen Proving Ground, Maryland

AYSEGUL NALCA, MD, Ph.D
Chief, Department of Animal Studies, Center for Aerobiological Sciences, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

DAVID A. NORWOOD, Ph.D
Chief, Diagnostic Systems Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

ARNOLD PARK, Ph.D
Postdoctoral Fellow, Microbiology Department, Icahn School of Medicine at Mount Sinai, One Gustave L. Levy Place, Annenberg Building, Room 17-24, New York, New York 10029

MICHAEL D. PARKER, Ph.D
Retired; formerly, Chief, Viral Biology Department, Virology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

JULIE A. PAVLIN, MD, Ph.D, MPH
Colonel (Retired), Medical Corps, US Army; Deputy Director, Armed Forces Health Surveillance Center, 11800 Tech Road, Silver Spring, Maryland 20904

BRUNO PETRUCCELLI, M.D
Colonel (Retired), Medical Corps, US Army; formerly, Director, Epidemiology and Disease Surveillance, US Army Center for Health Promotion and Preventive Medicine, Aberdeen Proving Ground, Maryland; currently, Senior Physician/Epidemiologist, US Army HIV Research Program, Henry M. Jackson Foundation for the Advancement of Military Medicine, 3720-A Rockledge Drive, Suite 400, Bethesda, Maryland 20817

PHILLIP R. PITTMAN, MD, MPH
Colonel (Retired), Medical Corps, US Army; Chief, Department of Clinical Research, Division of Medicine, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

MARK A. POLI, Ph.D, DABT
Research Chemist, Department of Applied Diagnostics, Diagnostic Systems Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

MICHEL R. POPOFF, Ph.D, DVM
Chief, Anaerobic Bacteria and Toxins, Institut Pasteur, 28 Rue du Dr Roux, 75724 Paris, France

BRET K. PURCELL, Ph.D, MD
Colonel, Medical Corps, US Army; Deputy Chief, Bacteriology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

SHELI R. RADOSHITZKY, Ph.D
Principal Investigator, Molecular and Translational Sciences Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; formerly, Postdoctoral Fellow, Toxicology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

DOUGLAS S. REED, Ph.D
Associate Professor, Aerobiological Manager, RBL, Department of Immunology, University of Pittsburgh, 3501 Fifth Avenue, Pittsburgh, Pennsylvania 15261; formerly, Microbiologist, Center for Aerobiological Sciences, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

R. MARTIN ROOP II, Ph.D
Professor, Microbiology and Immunology, Brody School of Medicine, East Carolina University, 600 Moye Boulevard, Room 118, Biotechnology Building, Greenville, North Carolina 27834

VIRGINIA I. ROXAS-DUNCAN, Ph.D
Alternate Responsible Official and Chief, Select Agent Management Branch, Biosafety Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

CHAD J. ROY, Ph.D
Associate Professor, Department of Microbiology and Immunology, Tulane School of Medicine, 1430 Tulane Avenue, New Orleans, Louisiana 70112; and Director, Infectious Disease Aerobiology Division, Microbiology, Tulane National Primate Research Center, 18703 Three Rivers Road, Covington, Louisiana 70433

JANICE M. RUSNAK, MD
Lieutenant Colonel (Retired), US Air Force; Medical Director, Battelle, 1564 Freedman Drive, Fort Detrick, Maryland 21702; formerly, Deputy Director of Special Immunizations Program, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

KAMAL U. SAIKH, Ph.D
Microbiologist, Department of Immunology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

WENDY SAMMONS-JACKSON, Ph.D
Lieutenant Colonel, Medical Service Corps, US Army; Military Deputy, Science and Technology Department, US Army Medical Research and Materiel Command, 810 Schreider Street, Suite 103, Fort Detrick, Maryland 21702; formerly, Deputy Director, Military Infectious Diseases Research Program, Fort Detrick, Maryland

JAMES E. SAMUEL, Ph.D
Professor and Chair, Department of Microbial Pathogenesis and Immunology, College of Medicine, Texas A&M Health Science Center, 8447 State Highway 47, Medical Research and Education Building, Building 3112, Bryan, Texas 77807

ALAN L. SCHMALJOHN, Ph.D
Professor, Department of Microbiology and Immunology, University of Maryland School of Medicine, 655 West Baltimore Street, HSF-I, 322B, Baltimore, Maryland 21201

CHAD J. ROY, Ph.D
Associate Professor, Department of Microbiology and Immunology, Tulane School of Medicine, 1430 Tulane Avenue, New Orleans, Louisiana 70112; and Director, Infectious Disease Aerobiology Division, Microbiology, Tulane National Primate Research Center, 18703 Three Rivers Road, Covington, Louisiana 70433
RANDAL J. SCHOEPP, Ph.D
Chief, Immunodiagnostics and Biologics Department, Diagnostic Systems Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

MARTINA SIWEK, Ph.D
Chief Scientist, Cherokee Nation Technology Solutions in Support of Global Emerging Infections Surveillance and Response System, Armed Forces Health Surveillance Center, 11800 Tech Road, Silver Spring, Maryland 20904; formerly, Science Manager/Liaison, Biosurveillance Management Office, Joint Program Executive Office, Aberdeen Proving Ground, Maryland

JONATHAN F. SMITH, Ph.D
Executive Vice President and Chief Scientific Officer, PaxVax, Inc, 3985 Sorrento Valley Boulevard, San Diego, California 92121; formerly, Chief, Viral Biology Department, Virology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

LEONARD A. SMITH, Ph.D
Senior Research Scientist (ST) for Medical Countermeasures Technology, Office of the Chief Scientist, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

JEFFREY E. STEPHENSON, Ph.D
Regulatory Compliance Specialist, US Army Medical Research and Materiel Command, Telemedicine and Advanced Technology Research Center, 1054 Patchel Street, Fort Detrick, Maryland 21702; formerly, Institutional Review Board Administrator, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

BRADLEY G. STILES, Ph.D
Adjunct Professor of Biology, Biology Department, Wilson College, 1015 Philadelphia Avenue, Chambersburg, Pennsylvania 17201

JEAN-NICOLAS TOURNIER, MD, Ph.D
Colonel, French Armed Forces Health Service, Department of Infectious Diseases, Unité Biothérapies anti-infectieuses et immunité, Institut de recherche biomédicale des armées, 1 place du Général Valérie André, Brétigny-sur-Orge, 91220 France; Unité Génomique virale et vaccinologie, Institut de recherche biomédicale des armées, 1 place du Val-de-Grâce, Paris, France; Unité Génomique virale et vaccination, Institut Pasteur, Paris, France

ROBERT G. ULRICH, Ph.D
Microbiologist, Department of Immunology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

NICHOLAS J. VIETRI, MD
Colonel, Medical Corps, US Army; Infectious Diseases Officer, Bacteriology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; and Assistant Professor of Medicine, Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Bethesda, Maryland 20814

DAVID M. WAAG, Ph.D
Microbiologist, Bacteriology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

SCOTT A. WEINSTEIN, Ph.D, MD
Physician, Toxinologist, Toxinology Division, Women’s & Children’s Hospital, 72 King William Road, North Adelaide, South Australia 5006, Australia

SUSAN L. WELKOS, Ph.D
Microbiologist, Bacteriology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

JULIAN WHITE, MD
Head of Toxinology, Toxinology Division, Women’s & Children’s Hospital, 72 King William Road, North Adelaide, South Australia 5006, Australia

CHRIS A. WHITEHOUSE, Ph.D
Principal Investigator, Molecular and Translational Sciences Department, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702; formerly, Chief, Disease Investigation Branch, US Geological Survey, National Wildlife Health Center, 6006 Schroeder Road, Madison, Wisconsin

CATHERINE L. WILHELMSSEN, DVM, Ph.D, CBSP
Lieutenant Colonel (Retired), Veterinary Corps, US Army; Veterinary Medical Officer, Division of Pathology; formerly, Biosafety Officer, Office of Safety, Radiation Protection, and Environmental Health, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland; formerly, Chief, Division of Toxicology, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

MARK R. WITHERS, MD, MPH
Colonel, Medical Corps, US Army; Clinical Director, Office of Medical Support and Oversight, US Army Research Institute of Environmental Medicine, 15 Kansas Street, Natick, Massachusetts 01760; formerly Deputy Chief, Division of Medicine, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland

MARK J. WOLCOTT, Ph.D
Chief, Transitional and Operational Diagnostics Department, Diagnostic Systems Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

NEAL E. WOOLLEN, DVM, MSS, Ph.D
Colonel, Veterinary Corps, US Army; Director, Department of Biological Select Agent and Toxin Biosafety Program Office, 1546 Porter Street, Fort Detrick, Maryland 21702

PATRICIA L. WORSHAM, Ph.D
Chief, Bacteriology Division, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

GLENN WORTMANN, MD
Colonel (Retired), Medical Corps, US Army; formerly, Chief of Infectious Diseases, Walter Reed National Military Medical Center, Bethesda, Maryland; currently, Assistant Director, Infectious Diseases Section, MedStar Washington Hospital Center, 110 Irving Street, NW, Washington, DC 20010
KRISTIE M. YEAKLE, RBP
Alternate Biosafety Officer, Office of Safety, Radiation, and Environment, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702
Peer Reviewers

AMES A. ADALJA, MD, FACP, FACEP
Senior Associate, UPMC Center for Health Security, 621 East Pratt Street, Suite 210, Baltimore, Maryland 21202; and Clinical Assistant Professor, Department of Critical Care Medicine Clinical Assistant Professor, and Department of Emergency Medicine Adjunct Instructor, Division of Infectious Diseases, Department of Medicine, University of Pittsburgh School of Medicine, M240 Scaife Hall, 3550 Terrace Street, Pittsburgh, Pennsylvania 15261

GERARD ANDREWS, PhD
Associate Professor, Department of Veterinary Sciences, University of Wyoming, College of Agriculture and Natural Resources, 1174 Snowy Range Road, Laramie, Wyoming 82070

ROY BARNEWELL, Ph.D
Manager and Research Leader, Battelle Memorial Institute, 505 King Avenue, Columbus, Ohio 43201

HOLGER BARTH, Ph.D
Professor, Institute of Pharmacology and Toxicology, University of Ulm Medical Center, Albert-Einstein-Allee 11, 89081 Ulm, Germany

KENNETH BRADLEY, Ph.D
Associate Professor, Department of Microbiology, Immunology, and Molecular Genetics Director, Molecular Screening Shared Resource, University of California, 609 Charles E. Young Drive East, Los Angeles, California 90095

BARBARA A. BROOKMYER, MD, MPH
Health Officer, Frederick County Health Department, 350 Montevue Lane, Frederick, Maryland 21702

LAURA RUSE BROSCH, RN, Ph.D
Director, Office of Research Protections and Director, Office of Research Protections Human Research Protection Office, Headquarters, US Army Medical Research and Materiel Command, 810 Schreider Street, Fort Detrick, Maryland 21702

MICHAEL BUCHMEIER, Ph.D
Professor, Department of Molecular Biology and Biochemistry, Division of Infectious Disease, Department of Medicine, Department of Microbiology and Molecular Genetics, and Department of Molecular Biology and Biochemistry, University of California–Irvine, 2400 Biological Sciences III, Irvine, California 92697-3900

R. MARK BULLER, Ph.D
Professor, Department of Molecular Microbiology and Immunology, Saint Louis University, 1100 South Grand Boulevard, St. Louis, Missouri 63104

KATHLEEN W. CARR, DVM, Ph.D, MS
Program Manager, Division of Medicine, US Army Medical Research Institute of Infectious Diseases, 1425 Porter Street, Fort Detrick, Maryland 21702

BRIAN W. COOPER, MD
Global Medical Affairs Medical Director of Early Viral/Bacterial Vaccines, Novartis Vaccines, 350 Massachusetts Avenue, Cambridge, Massachusetts 02139; and Professor of Clinical Medicine, University of Connecticut School of Medicine, 263 Farmington Avenue, Farmington, Connecticut 06030

PAUL DABISCH, Ph.D
Senior Principal Investigator and Aerobiology Group Leader, National Biodefense Analysis and Countermeasures Center (operated by BNBI for the US Department of Homeland Security), 8300 Research Plaza, Fort Detrick, Maryland 21702

ROBERT G. DARLING, MD, FACEP
Captain (Retired), Medical Corps, US Navy; Chief Medical Officer, Patronus Medical Corporation, Washington, DC; and Assistant Professor Military and Emergency Medicine, The Uniformed Services University of the Health Sciences F. Edward Hébert School of Medicine, 4301 Jones Bridge Road, Bethesda, Maryland 20814

GENE OLINGER, Ph.D, MBA
High Containment Coordinator, National Institute of Allergy and Infectious Diseases, Integrated Research Facility, Division of Clinical Research, 8200 Research Plaza, Fort Detrick, Maryland 21702
Foreword

The concept of national defense has been undeniably shaped by the events of September 11, 2001. The US anthrax postal attacks immediately following 9/11 forever changed our perspective of biodefense related research. More recently, the continued threat of state-sponsored events or individual extremist groups has only compounded the severity of this facet of national security. As we focus our medical efforts to succeed at the point of injury, and to optimize the success of the operating forces, the identification and preparation for biological threats has become a synergistic force multiplier.

The US Department of Defense (DoD) continues to identify potential threats and prepare for possible biological attacks by maintaining a knowledge base and by actively developing and testing novel medical countermeasures. For example, scientists at the US Army Medical Research Institute of Infectious Diseases (Fort Detrick, MD) have developed vaccines against the causative agents of anthrax, plague, ricin intoxication, botulinum intoxication, Ebola virus, and encephalitic alphaviruses. Importantly, DoD scientists partner with other federal agencies, academic institutions, and pharmaceutical companies to test and evaluate vaccines and therapeutics against many other biological threats. There is no better example of this consortium approach then the DoD’s efforts during the recent Ebola outbreak in West Africa. DoD scientists and military personnel were on the ground diagnosing samples, sequencing viral genomes, and administering supportive care. Concurrently, some of the very products tested and evaluated by the DoD were deployed during the medical emergency. If it was not for DoD intervention, this outbreak had the potential to be substantially worse and spread further across Africa and around the world. Taken together, these brief examples demonstrate exactly why Medical Aspects of Biological Warfare needs to be maintained as an up-to-date information source.

The first edition of Medical Aspects of Chemical and Biological Warfare was published in 1997. A decade later, the chemical and biological aspects of this text warranted separate volumes. Thus, in 2007, Medical Aspects of Biological Warfare was released as a stand-alone textbook. Because of the fast-paced nature of microbiological research, new and emerging threats, and the changing policy, the authors pursued an updated version. In this third edition of Textbooks of Military Medicine’s Medical Aspects of Biological Warfare, the authors have gone to great lengths to address many facets of biodefense research, preparedness, and consequence management. Individual chapters are devoted to understanding the pathogenesis and disease progression associated with bacterial and viral biothreat agents, such as Bacillus anthracis and Ebola virus. Additionally, intoxications by toxins such as ricin are also described in detail. These chapters highlight the current state of science for these agents and toxins: they clearly underscore the importance of pursing basic science interests in these arenas, and the importance of maintaining a core pool of subject matter experts. Without basic science efforts, our continued understanding of these threats would suffer, and knowledge gaps would grow. Accordingly, current clinical treatment protocols and regimens are also discussed throughout the textbook and offer a bridge from the basic research to the applied clinical “real-world” applications.

This textbook also examines other less apparent biodefense-related topics. Acinetobacter baumannii is used as an example of how a drug-resistant bacterium can impact the DoD, and further demonstrates how the institutional structure and strategic planning can be used to address such threats. Additional chapters discuss Medical Management and Consequence Management, and give current perspectives on patient care and federal and local response scenarios in the event of a biological attack. This edition also describes current laboratory biosafety and biosurety philosophies that have tremendous impacts on the execution of biodefense strategies that are constantly evolving. Finally, this version of the textbook gives a nod to the history of biodefense research while also addressing new and emerging biological threats, be they natural or engineered.

The authors, subject matter expert reviewers, and editors have produced a comprehensive and thoughtful reference source for the DoD, and I am proud of the scientists, physicians, and other professionals who contributed their time and efforts to produce the final product.

Lieutenant General Nadja Y. West, MD
The Surgeon General
Commanding General, U.S. Army Medical Command

Washington, DC
March 2017
Preface

In an ever-changing and complex world, medical defense against biological pathogens must be a central pillar of our national defense strategy. Although biological warfare has been a legitimate concern for centuries, our current requirements and future operations emphasize the need for a continuing holistic approach to medical biological defense against these threats. From antiquity to the present day, agents such as *Bacillus anthracis* (etiological agent of anthrax), *Francisella tularensis* (etiological agent of tularemia), *Burkholderia mallei* (etiological agent of glanders), *Yersinia pestis* (etiological agent of plague), and *Variola* (etiological agent of smallpox) have been on the forefront of biowarfare and biodefense. With increased uncertainty associated with terrorist groups, rogue nations, and “lone wolf” individuals, the threat of biological weapons is even more relevant today.

Subject matter experts who wrote and reviewed these chapters focused on the most current data available at the time to create the most comprehensive reference source available for the US Department of Defense. Revising this textbook is important, not only to highlight the current state-of-the-art application for medical countermeasures, but also to discuss myriad current and future threats. Some of these evolving issues include the ongoing ramifications of the world’s largest-ever Ebola virus disease outbreak and the impact of emerging antibiotic resistance from select bacterial pathogens. Of recent note is the emerging *B cereus* biovar *anthracis* strains isolated in Africa from fatal anthrax-like infections in chimpanzees and western lowland gorillas. These strains of *B cereus* were shown to harbor plasmids highly similar to both *B anthracis* virulence plasmids and, accordingly, were included on the US Department of Health and Human Services select agent list in 2016. These are just a few of the examples that underscore the complexities of biodefense research. Although we must remain vigilant in anticipating state-sponsored or terrorist activities, new threats are evolving in the natural world that could prove equally catastrophic to our military personnel and national interests. Preparation, cooperation, and rehearsal in accordance with the latest methodologies are the key ingredients to success in these current contexts.

I am deeply grateful for the contributions of the scientists and physicians who collaborated in this endeavor. They are nationally and internationally recognized experts in their specialties, and their dedication to updating this textbook has been invaluable. I am pleased to introduce the latest edition of *Medical Aspects of Biological Warfare*.

Colonel Thomas S. Bundt
Medical Service Corps, US Army
Commander, US Army Medical Research Institute of Infectious Diseases

Fort Detrick, Maryland
